

# EUROPEAN SPATIAL

# PLANNING

– plan your **future**  
in **Sweden**

Are you interested in spatial planning from an EU-perspective? Would you like to combine your studies with a one-year stay on the Swedish southeast coast? If so, we have the perfect offer for you.

Sweden has a long tradition of planning and architecture. The ambition to create a society which is based on human physical and social needs, places us among the world's leading countries in the field.

Blekinge Institute of Technology in Karlskrona offers a unique Master's Programme, European Spatial Planning, which targets academics and professionals from all over Europe and worldwide. We have a clearly defined EU-perspective, which means that the knowledge and proficiency you obtain here can be used within a growing European Union. The programme mixes concrete planning tasks with creative and analytical ones.

The variation of backgrounds and areas of expertise among our students creates a dynamic and cross-fertilizing study environment. A European labour market with many different work opportunities lies open after graduation.

As a student in Karlskrona you are right in the middle of a world heritage where references to the city's exciting history are as present as the sound of waves from the Baltic Sea. Here you will find a close collaboration between the Institute, trade and industry and the community – especially The National Board of Housing, Building and Planning with its headquarters in Karlskrona.

**Last application date: March 1, 2006.**
